In recent years, many students are reading digital books both at school and at home using tablets such as iPads. However, digital reading can also weaken reader's comprehension, particularly for longer, more complex texts. In that case, it seems that reading books in print still has a number of benefits. Do you agree with reading digital books? What are some of the advantages or disadvantages of reading books in paper format compared to reading an e-book? Choose which one is better for you, paper format or e-book? Explain your opinion with examples.
