1970 年以前の日本では鉛筆や箸を右手で持つように矯正された。この慣習は緩和されたがなくなったわけではない。調査によると、日本育ちの左利き回答者のうち 66%は利き手を変えるよう強制されたが、それに従わず左手を使い続けたのは半数に留まった。海外育ちの場合、強制される割合はより低く、抵抗する割合はより高かった。親は左利きの人が経験していることを知るべきである。 [179 字]

Q4

At university, there are many things I want to try. However, given the opportunity, I would love to join an interesting club and focus on improving my English skills.

I have always been fascinated by ice hockey, and I know some universities offer ice hockey clubs. I hope to join one and make new friends. I think I could improve my skills by learning from them. Additionally, I dream of studying abroad in Canada someday to watch a professional ice hockey game. To make this possible, I plan to study English diligently and prepare for tests like TOEFL or IELTS. I believe this will help me achieve my goal of living and studying in an English-speaking country.

Although balancing club activities and English test preparation may be challenging, I am determined to do my best. I am excited to become a university student and experience many new opportunities and challenges.
